EXPERIENCE

August 2020 – Present

Senior Frontend Developer

CompanyCam / Lincoln, NE

- Build and integrate dynamic components with Craft CMS using Twig templating and content modeling to support marketing goals
- Implement responsive, mobile-first designs prioritizing performance, accessibility, and scalability across devices
- Collaborate with web product managers, designers, and marketers to scope requirements and translate them into maintainable code
- Manage staging and development environments, overseeing automated deployment processes to streamline feature rollouts
- Leverage AI tools (Claude Code, Devin) to accelerate development, improve code quality, and prototype solutions faster
- Maintain core web vitals, site performance audits, and cross-browser debugging to ensure a consistent user experience

May 2018 – August 2020

Senior Frontend Developer

Hudl / Lincoln, NE

- Maintained Craft CMS environment for the marketing website
- Built high-quality landing pages from design mockups for marketing campaigns
- Developed site sections for the support team, improving content usability

December 2017 – May 2018

Frontend Developer

Unanimous / Lincoln, NE

- Developed client Drupal websites at a full-service digital ad agency
- Conducted research on emerging frontend web standards and implementation patterns

August 2015 – November 2017

Frontend Developer

Firespring / Lincoln, NE

- Built custom nonprofit client sites on a proprietary CMS platform
- Wrote custom JavaScript to extend and enhance CMS template functionality
